eNotice

Introduction

eNotice is an Automated Clients Notification System, eNotice is installed on Client's Computer as a Service Application. This service application keeps on monitoring Database on Web Server and on any updates in online Database it pops up a small Message on Left Bottom Corner of Screen, notifying user of the updates.

Features

1. Automatic Notifications

As Administrators post updates on Server, all client applications Pop up the Notification window and loads Web URL, returned by server

2. Notice Settings and Preferences

Notice duration, sound settings, user name and password can be set in this preferences screen

3. Unlimited Number of Clients

Unlimited number of users/clients can connect to single server. And depending on server bandwidth each client is notified immediately on updates in server

4. Different notices for different users

Administrators posts messages for specific groups, so only users assigned to that group gets the posted messages

5. Customizable Notice Window

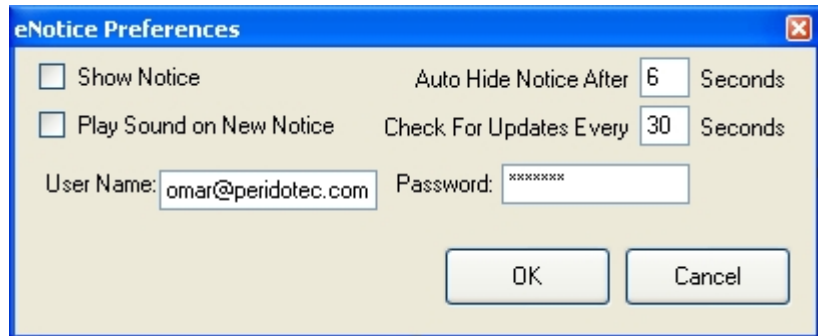

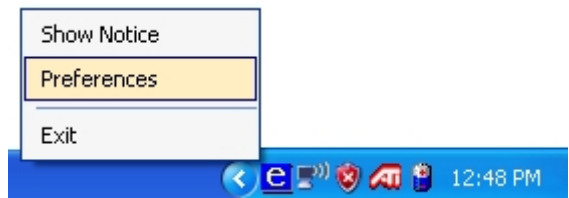

Notice size and layout can be customized by sending parameters in URL

6. Easy to use Administration Panel

Easily manageable administration panel allows administrators, to easily manage user accounts and post new messages

7. Best for Notifying Products Updates, Games Score and Breaking News

This solution can be used by several industries like Manufacturers, Games Score Boards, News Agencies etc.

For More Information regarding this system please contact Peridot Technologies (Pvt.) Ltd. Or Visit <http://www.peridotec.com>
